

SMARTVALVE

YOUR ANSWER TO
SMARTER SAVING

GENIUS

A little marvel of smart thinking, the Smartvalve is plumbing's best mate. Homeowners and business owners love it when they know it can save moneylots of money! Not just as a one-off, but every time they turn on the tap or shower.

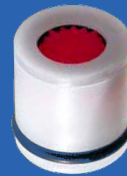

SIMPLE

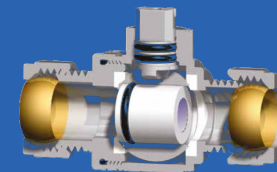

A simple isolation valve that works like any ordinary isolation valve when it's closed...

CLEVER

...but has a cartridge placed inside the ball...

SMART

...so when its open it becomes a **Smartvalve** saving you money.

Wherever you'd fit an isolation valve, that's where you should fit the Smartvalve. Plumbers need no special skills or training, but it does so much more than just isolation. Like conserving water, slashing bills and preventing splashback. Clever stuff.

MIGHTY

BENEFITS

FOR EVERYONE

Plumbers, architects, and home-owners all benefit from the SmartValve. Installed in the same manner as any other isolation valve, and it not only saves money, but also solves any problems that may arise. So, whenever an isolation valve is required, a SmartValve is the wise choice.

PERFORMANCE

High water pressure can cause splashback, then demand to various outlets can cause water shortages, so mixer showers can't always handle the supply of hot, and cold water efficiently. The SmartValve can handle it all while delivering steady water flow.

MULTI-TALENTED

Versatile plumbing solution used for various situations; balance a system, avoid water starvation, prevent splashback, fix mixing valve issues. Caters for any kitchen, or bathroom fitting complies with water conservation regulations, all while saving you money.

BENEFITS

FUTURE PROOF

Certified to comply with current regulations however, you never know what the future holds, but you can trust the SmartValve, because not only is replacing the cartridge for a different flow rate is simple, and quick, there are cartridges ranging from 2.5 to 26 litres per minute.

SIMPLE AS ABC

The SmartValve should be installed anywhere an isolation valve would be. Plumbers don't need any special training, and it does a lot more than just isolate pipes. Water conservation, bill reduction, and splashback prevention to name a few.

NO LIMITS

There are no constraints with the SmartValve, because it works with any tap, shower, or appliance, giving you complete freedom to design your bathroom, kitchen, or utility room however you like. Perfect!

BRILLIANT

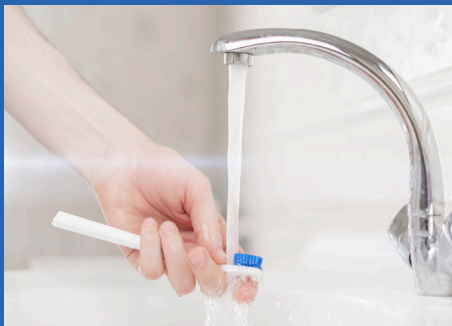

LITTLE PROBLEM SOLVER

Whether you're a home owner, a plumber, an architect or responsible for the commercial or public sector the Supervalve is your one answer to a multitude of situations. Firstly it allows you to meet current building regulations but more importantly overcome some common supply problems, like too much outlet pressure or water starvation, whilst returning some attractive savings on your utility bills.
